STANDARD	ID.1.	Nature of Science: Students carry out investigations over time using appropriate tools and equipment. Students make inferences based upon data they collect. Students accurately communicate the results of their investigations and observations. Students support or revise their conclusions by critically analyzing alternate explanations. Students carry out investigations following written lab procedures. Students follow safety protocols in carrying out investigations.
CONTENT KNOWLEDGE AND SKILLS / GOAL	1.1.	Understand Systems, Order, and Organization
GLE / BIG IDEA	7.S.1.1.1.	<p>The student will be able to define small systems as a part of a whole system. (633.01.a)</p> <ul style="list-style-type: none"> • Teacher Resource CD: Human Health Issues and Disease • Teacher Resource CD: Human Physiology • Teacher Resource CD: The Human Machine

STANDARD	ID.1.	Biology: Nature of Science: Students exercise the basic tenets of scientific investigation, make accurate observations, exercise critical thinking skills, apply proper scientific instruments of investigation and measurement tools, and communicate results in problem solving. Students evaluate the validity of information by utilizing the tools of scientific thinking and investigation. Students summarize their findings by creating lab reports using technical writing including graphs, charts, and diagrams to communicate the results of investigations.
CONTENT KNOWLEDGE AND SKILLS / GOAL	1.8.	Understand Technical Communication

STANDARD	ID.3.	Biology: Biology: Students explain the importance of cells as they relate to the organization and structure of complex organisms, differentiation and specialization during development, and the chemical reactions necessary to sustain life. Students describe the functions of cell structures. Students use the theory of evolution to explain diversity of life.
CONTENT KNOWLEDGE AND SKILLS /	3.2.	Understand the Relationship between Matter and Energy in Living Systems

GOAL		
GLE / BIG IDEA	10.B.3.2.2.	<p>The student will be able to explain how organisms use the continuous input of energy and matter to maintain their chemical and physical organization.
